THE COMPANY

GoldStar CNC, based in Miami, Florida, has led the industry in woodworking innovations for over two decades and continues to challenge the industry with new advancements.

At GoldStar CNC, our main mission is to provide quality in our products with a national reach.

We are involved in community programs where we offer our time, support, products, and services.

We launched our first line of CNC machines in early 1998 and soon followed it with machines for making signs. After innovating in the CNC router end, we introduced even more advanced machinery, such as CO2 lasers and plasma cutters. Now we have a wider range of machinery available, all to help our clients achieve their business goals and improve the way they do business.
